## Executive Summary

# Transforming personal finance from reactive expense tracking into predictive financial decision-making.

| Problem | | | Opportunity | |
|---|---|---|---|---|
| Limited forward visibility | Low emergency readiness | Financial literacy and saving gaps | Rising demand for smarter personal finance tools | AI enables predictive and personalized finance |

| | | | |
|---|---|---|---|
| ***Strategies*** | **Hybrid Model**: Combine a subscription-based app with embedded finance partnerships to create both user value and diversified revenue streams. | **Focus on Depth and Scale**: Build a strong AI-driven financial twin, predictive engine, and risk forecasting system that can scale through secure API integrations. | **Protect Retention & QA Audits**: Deliver a simple, minimal UI with autonomous guidance, strong data security, and continuous model improvement to sustain trust and retention. |
| ***Impact*** | **Better financial decision-making:** Users receive real-time recommendations on budgeting, capital allocation, and liquidity planning instead of only viewing past transactions. | **Improved financial resilience:** Predictive cash flow and savings simulations help users prepare for emergencies and reduce the risk of short-term financial shocks. | **Higher inclusion and long-term engagement:** A digital, accessible platform helps young professionals and financially fragile users build healthier financial habits over time. |

Company Profile

# OptiWealth: Closing the Gap Between Historical Data and Future Financial Freedom

## OptiWealth Background

OptiWealth
PREDICTIVE FINANCIAL COPILOT

**Who:** A B2C Fintech platform providing a "Predictive Financial Copilot" specifically tailored for the Indonesian market.

**Current State:** Currently refining our proprietary AI engine that aggregates fragmented financial data into a unified, actionable dashboard.

**Key Challenges:** Overcoming the fragmented banking API landscape in Indonesia and validating high willingness-to-pay for premium AI insights.

## OptiWealth's Main Focus

- *Predictive AI*
- *Unified Dashboard*
- *Actionable Insights*
- *Hyper-Localization*

## Strategic Initiatives

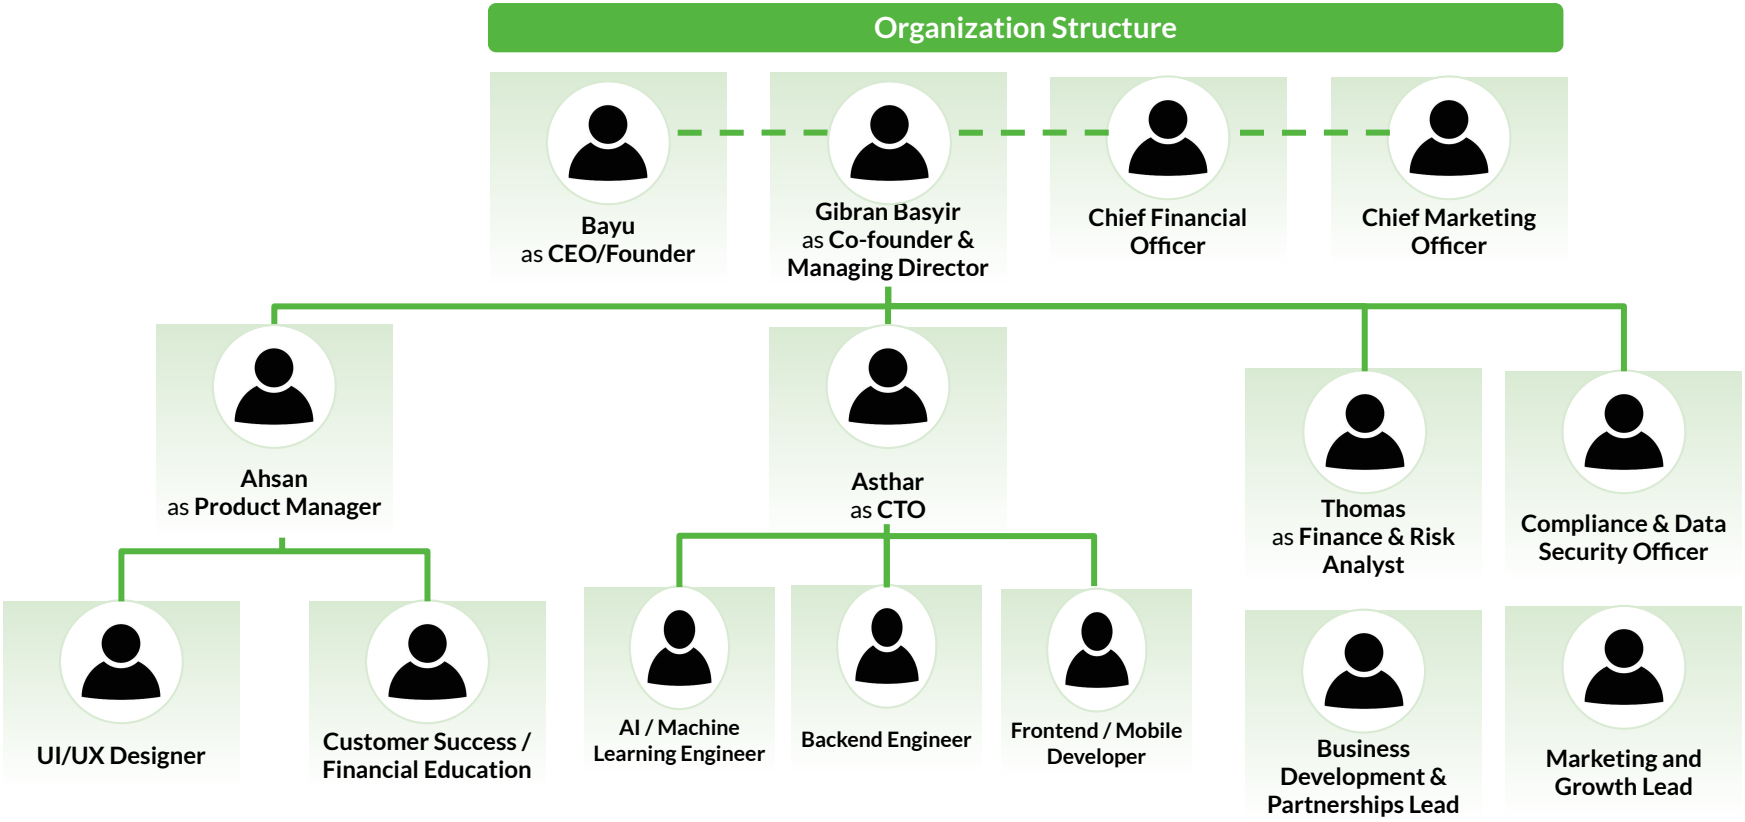
| | |
|---|---|
| *API Integration* | Partner with Open Finance aggregators to bridge fragmented banking data. |
| *User Retention* | Deploy gamification to transform passive tracking into active financial habits. |
| *Scalable Monetization* | Free automated tracking with "AI Investment Advisory" as a premium tier. |
| *Trust & Security* | Implement bank-grade encryption and ISO 27001 standards for user data sovereignty. |

## The Strategic Divide

| *Customer Wants* | *Current Offering* |
|---|---|
| A single source of truth for all bank accounts, e-wallets, and investments. | Most users rely on spreadsheets or math, leading to high "drop-off" rates. |
| Advice that warns them before they overspend, not a month later | Standard bank apps only show historical data, offering no predictive value. |
| Simplified metrics that explain their "Financial Health Score" without jargon. | Users must jump between 4+ apps to get a full picture of their net worth. |

Our mission is to bridge the gap between financial data and financial freedom by providing every Indonesian with an AI-driven, predictive roadmap to wealth.

# A closer look at how our Organizational Structure translating into a clear structure, execution roles, and new recruits.



# Deep Dive: A closer look at how our Organizational Structure translating into a clear structure, execution roles, and new recruits.

## Recruits

*To ensure effective execution, we define **clear recruitment criteria** ...*

- Relevant expertise
- Execution-Oriented attitude
- User centered mindset
- Data Privacy & Security Awareness

*... and role-specific **responsibilities for each new hire**.*

### Compliance & Data Security Officer

Responsible for

- **Handles** Data Privacy
- **Financial** regulation
- **Compliance** with fintech rules

### Business Dev & Partnership Lead

Responsible for

- **Builds** relationships with banks
- **Investment** platforms
- **Insurance** companies

### Marketing Growth & Lead

Responsible for

- **Manages** branding and media
- **User** acquistion
- **Positions** market, campaigns

## Why this Structure is Chosen

*It matches the maid needs of **OptiWealth** as an **AI fintech startup***

**Matches OptiWealth's core needs:** The structure supports an AI-based fintech product that needs technology, finance, security, and user trust.

**Keeps the team focused on the MVP:** The Product Manager helps prioritize key early features such as cashflow forecasting, expense tracking, and basic recommendations.

**Strengthens the technical foundation:** The CTO, AI/ML Engineer, Backend Engineer, and Frontend Developer ensure the platform is accurate, secure, and scalable.

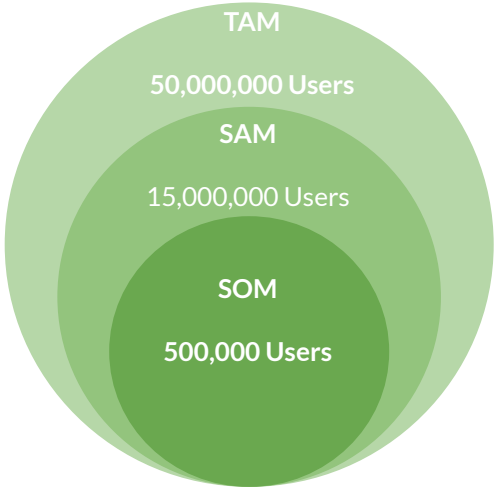
**Builds financial credibility:** The Finance & Risk Analyst helps validate recommendations so the app gives realistic and responsible financial guidance.

**Protects user trust:** The Compliance & Data Security Officer ensures privacy, security, and regulatory concerns are considered from the start.

**Supports future growth:** Business Development helps create partnerships with banks, fintech platforms, and embedded finance providers.

Market Research

# 50 Million Reachable Users and One Unmet Need: Forward-Looking Guidance.



**Total Addressable Market (TAM)**

**All digitally banked Indonesians aged 18–50**
±50,000,000 Users

**Serviceable Available Market (SAM)**

**Urban professionals aged 20–40 who are digitally native**
±15,000,000 Users

**Serviceable Obtainable Market (SOM)**

**Financially anxious young professionals in Tier-1 cities**
15,000,000 × ~3% = 500,000 Users

## Strategic Insight:

- Literacy gap: 75% inclusion but only 65% literacy; users have accounts, not guidance
- 53% of Indonesian workers undersaved last year; demand for predictive tools is real

**About:** Earns Rp 9–12M/month. Uses BCA, GoPay & OVO but has no unified view. Feels financially "lost" despite being digitally active.

| | |
|---|---|
| **Financial Behavior** | Splits income across 3 apps. Checks spending only at month-end. |
| **Pain Points** | Discovers overspending too late. No emergency fund. No cash forecast. |
| **Uniqueness** | Pays for Spotify & Netflix but no finance app has earned his Rp yet. |
| **Key Decision Factor** | Wants to be told what to do next, not what he already spent. |

Indonesia's fintech market is growing fast, from USD 20.93B in 2025 toward USD 32.67B by 2030. Finance app usage is surging, yet OJK data shows 1 in 4 Indonesians uses financial products they don't understand. Among professionals, access is near-universal (95% inclusion) but guidance remains the gap, which is exactly what OptiWealth addresses. Our 500K SOM reflects a conservative 3.3% capture of urban professionals aged 20–40, in line with freemium industry benchmarks.

# An Integrated Ecosystem Designed to Unify Fragmented Data and Predict Financial Outcomes

**The Core Objective: Frictionless Financial Foresight**

To eliminate the blind spots in personal finance by securely aggregating fragmented banking and e-wallet data into a single, intelligent ecosystem.

To empower Indonesian users to shift from reactive budgeting to proactive wealth-building through personalized, AI-driven interventions.

**What: Structure** → **How: Usage** → **Impact: Benefit**

| Product Name | Target Users | Strategic Function |
|---|---|---|
| Opti-Sync Dashboard | All Users (Freemium) | Consolidates multi-bank and e-wallet data (e.g., BCA, Mandiri, GoPay) via Open Finance APIs into a single unified view. |
| Forecast Copilot | Active Spenders | Analyzes historical spending behavior to predict upcoming cash flow shortages and recurring fixed expenses before they hit. |
| The Nudge Engine | Struggling Savers | Delivers gamified alerts to deter impulse buys and automatically micro-routes spare change to savings. |
| Wealth Advisory Pro | Premium Subscribers | Provides localized investment recommendations (e.g., SBN, local mutual funds) based on predictive surplus cash and risk profile. |

**Opti-Sync Dashboard:**

1. Real-time synchronization: Zero manual entry required for connected accounts.

2. Smart Categorization: AI automatically tags and sorts expenses with 95% accuracy tailored to Indonesian spending habits (e.g., "Warung", "Ride-hailing").

3. Bank-Grade Security: Utilizes read-only API tokens and ISO 27001-compliant encryption to ensure absolute data sovereignty.

Marketing Plan

# From Awareness to Revenue: A Three-Stage Growth Engine.

## Objective

- Introduce the market to our service.
- Build and earn benefits from partnerships.
- Sell quality but expensive services.

## Description

Education campaign that informs customers. Partner with adjacent companies. Incentivize free- tier users

## Impact

Improvements in services, loyalty and revenue.

## 1 Education Campaign

Inform the target market with the purpose and benefit of our service.

**Educational Digital Marketing:**
Place our campaign within online platforms that our target market frequently use so we can capture the attention of as many people as possible. Our campaign should inform users about the economic state of the world and educate them about the importance of financial knowledge.

*Strategic Goal*

Introduce our service into the minds of potential customers and also incentivize them.

## 2 Bank & Fintech Partnerships

Form relations with companies that work in similar industries.

**Digital Integration Partnerships:**
Give users the opportunity to automatically input their digital financial information within their bank to our service. This gives accurate and real-time financial data which improves our services as it is tailored to the customer.

**Discover and use Bank and Fintech Data and Technology:**
Technology from financial institutions can improve the reliability of our service or even expand it with new features.

*Strategic Goal*

- Secure real-time financial data and fintech technologies for accurate AI services.
- Gain new users through partnered bank and fintech companies.

## 3 Free-to-Premium Move

Convert existing users to premium-purchasing users.

**Incentivize free-tier users:**
Free-tier users have limited access to our service such as basic forecasting. Whenever users reach a limit, we can inform of them of how much more they can do with premium tier.

*Strategic Goal*

- Slowly convert existing users and build stronger loyalty.
- Create a new stream of monthly revenue with a premium subscription.

# From Infrastructure to Market: OptiWealth's 10-Month Execution Roadmap

| Activities \ Timeline | 2026 Q2 | 2026 Q3 | 2026 Q4 | 2027 Q1 | 2027 Q2 | 2027 Q3 | 2027 Q4 | 2028 Q1 | 2028 Q2 | 2028 Q3 | 2028 Q4 | 2029 Q1 | 2029 Q2 |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| **Product Strategy** | | | | | | | | | | | | | |
| Secure banking API integrations | 2m (define programs) | | | | | | | | | | | | |
| Build behavioral Financial Twin model | | 5 months | | | | | | | | | | | |
| Develop predictive engine & scenario logic | | | 8 months | | | | | | | | | | |
| Integrate minimalist UX/UI frontend | | | | | | 6 months | | | | | | | |
| **Go-To-Market** | | | | | | | | | | | | | |
| Beta launch & personalization validation | | 6 months | | | | | | | | | | | |
| Tiered subscription rollout | | | 9 months | | | | | | | | | | |
| Bank & fintech partnership onboarding | | | | | 10 months | | | | | | | | |
| Regional expansion beyond Java | | | | | | | | | 12 months | | | | |

**PRODUCT & INFRASTRUCTURE KPIs**

- API integrations live
- Financial Twin accuracy ≥ 85%
- App load time < 2s
- ISO 27001 compliance

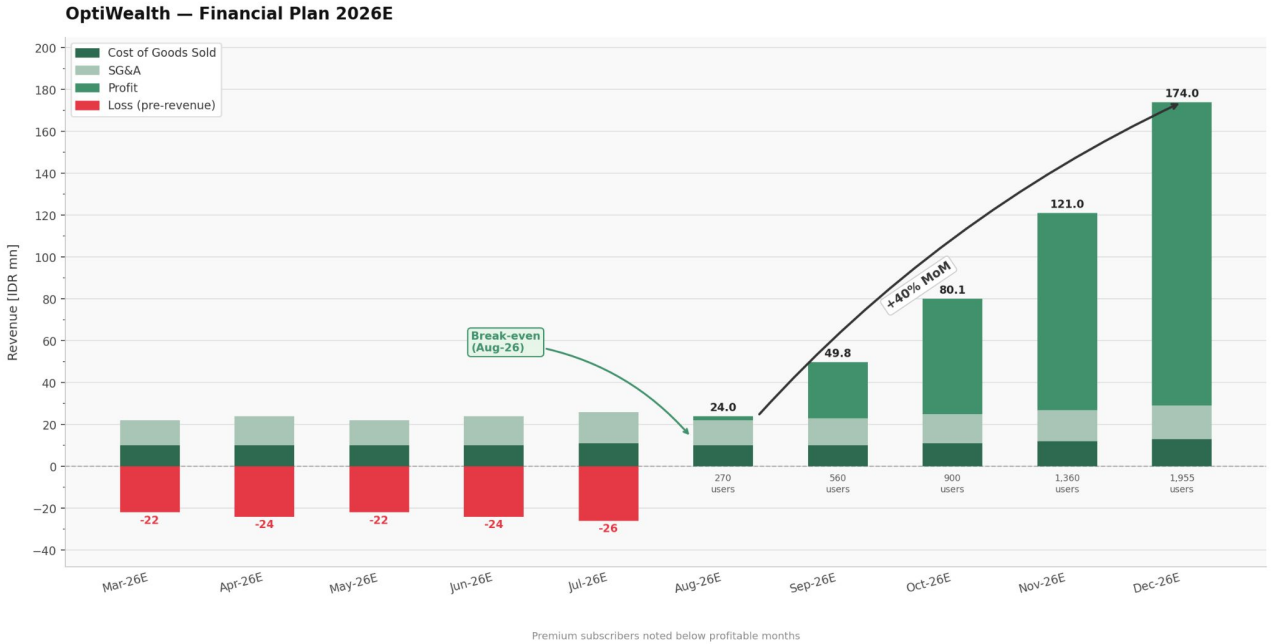
**GROWTH & RETENTION KPIs**

- 10,000 users by end of beta
- Free-to-premium conversion ≥ 8%
- MAU retention ≥ 60% at Month 10
- 2+ fintech partnerships signed by Q1 2027

# OptiWealth Turns Profitable at Month 6, Scaling to IDR 174mn Monthly Revenue by Year-End

**Revenue grows +40% MoM, reaching Rp 174mn by December 2026...**

**...with break-even achieved at Month 6, fully self-funded within Year 1.**



**Gross Margin: ~58%** **Net Margin (M6-M10): ~40%** **Cumulative Profit M6-M10: IDR 323mn**

1. **Break-even at Month 6** — The first 270 premium subscribers at Rp 89k cover operating costs

2. **Exponential post-launch scaling** — User base grows 5x between M6 and M10. Revenue compounds as conversion rate improves

**Key Metrics from M3-M12**

| ~58% | ~40% | 323mn |
|---|---|---|
| Gross Margin | Net Profit Margin | Total Profit |

# Appendix: Financial Projection

**OptiWealth — Monthly Financial Projection 2026E | Premium Price: Rp 89,000/month**

| Month | Phase | Total Users | Premium Users | Conv. Rate | Revenue (IDR mn) | COGS (IDR mn) | SG&A (IDR mn) | Net Profit (IDR mn) | Margin |
|---|---|---|---|---|---|---|---|---|---|
| Mar-26 | Infrastructure | 500 | 0 | — | 0 | 10 | 12 | -22 | — |
| Apr-26 | Infrastructure | 1,200 | 0 | — | 0 | 10 | 14 | -24 | — |
| May-26 | Beta Prep | 2,000 | 0 | — | 0 | 11 | 15 | -26 | — |
| Jun-26 | Beta Prep | 2,000 | 0 | — | 0 | 11 | 15 | -26 | — |
| Jul-26 | Beta Launch | 2,000 | 0 | — | 0 | 11 | 15 | -26 | — |
| **Aug-26** | **Break-even** | **4,500** | **270** | **6.0%** | **24.0** | **10** | **12** | **+2.0** | **8.3%** |
| Sep-26 | Growth | 8,000 | 560 | 7.0% | 49.8 | 10 | 13 | **+26.8** | 53.8% |
| Oct-26 | Growth | 12,000 | 900 | 7.5% | 80.1 | 11 | 14 | **+55.1** | 68.8% |

| Dec-26 | Scale | 23,000 | 1,955 | 8.5% | 174.0 | 13 | 16 | **+145.0** | 83.3% |

# Appendix

### Summary Metrics

| Metric | Value |
|---|---|
| Premium Price | Rp 89,000 / month |
| **Break-even Month** | August 2026 (M6) |
| **Break-even Subscribers** | **270 users** |
| Peak Monthly Revenue | IDR 174mn (Dec-26) |
| Peak Monthly Profit | IDR 145mn (Dec-26) |
| Cumulative Loss (M1-M5) | IDR -124mn |
| Cumulative Profit (M6-M10) | IDR +323mn |
| **Net Position by Year-End** | **IDR +199mn** |
| Avg Gross Margin (M6-M10) | ~58% |
| Avg Net Margin (M6-M10) | ~40% |
| User Growth Rate (post-beta) | ~40% MoM |
| Free-to-Premium Conversion | 6.0% -> 8.5% |

### Model Assumptions

| Assumption | Value |
|---|---|
| Revenue source Year 1 | Premium subscriptions only |
| Embedded finance revenue | Not modeled until 2027 |
| COGS composition | Cloud infra + AI API costs |
| COGS as % of revenue | ~40-42% |
| SG&A composition | Team salaries + marketing |
| User growth driver | Word-of-mouth + social post-beta |
| Conversion improvement | Personalization moat over time |
| Pre-launch cost (M1-M2) | IDR 20mn (not in monthly chart) |
